## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Solie et al (#5,681,467).

Solie et al show the method of producing a spiral membrane element with a multilayer structure comprising a membrane 25a that is folded, a feed side passage material 30a disposed on the feed side of the folded membrane, and a permeation side passage material 12a. Solie et al show a spirally wound structure on a core tube 10 with holes 11. Solie et al discloses that materials are sandwiched along the folded membrane 25a (col 1 lines 25+). The folded membrane is heated with means and then pressed using compression dies (col 10 lines 10+).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Drummond et al (#613) discloses pressing heated edges with roller means 108.
